

Software Highlights

Customized Solutions for Your Business

Our software is fully customizable which allows us to enhance programs and support your business as it grows. Developing long-term relationships with our customers is our priority - that's why several companies have been running our software for over thirty years. We pride ourselves on our agile and scalable approach to developing business solutions.

Do you see the need for a customized upgrade? We're always eager to explore new possibilities. We often find that a good idea

can benefit a variety of customers. In many cases that leads to development cost sharing - easing the price for individual customization and improving the functionality for the larger customer base.

The general highlights of the Agribusiness System are outlined below - Sales and Warehouse programs are integrated but can be purchased individually. Check our website to learn more about our add-on modules such as Pallet Ticketing, Payroll, Touch-Screen Timeclock, Graphical Sales/Reporting and Grower Websites.

Call (509) 884-1542 today for more information.
